Feeling at home in foreign markets.

GERMAN CENTRE
FOR INDUSTRY AND TRADE

INDONESIA

Indonesia - Revival of a Tiger

With a population of over 240 million, Indonesia is the fourth largest nation in the world and the third most populous democracy. It offers many opportunities for market entry in seminal key sectors. As one of the founding members of the Association of South-East-Asian Nations (ASEAN), Indonesia entered into a Free Trade Agreement with China in 2010. Furthermore, Indonesia is the only South-East-Asian state that is a member of the G-20. Its global influence is growing steadily.

In the German Centre Indonesia, you will find multifunctional spaces, from small to large, at competitive rates. You can benefit from the experienced and helpful German Centre Management. Their German quality concept, ISO certified, combined with their many years of experience, help you to make your market entry into Indonesia as smooth as possible.

Attractive growth market with opportunities in many industries

For many it was a surprise that Indonesia's economy weathered the worldwide crisis relatively unharmed. In fact, over the past few years Indonesia has transformed into a revived tiger economy and is, alongside India and China, one of the most attractive markets in Asia.

Indonesia's huge domestic market, abundance in natural resources, and need for infrastructure development has recently led to a strong increase in foreign investment, especially from its Asian neighbors.

Jakarta, Indonesia's capital with a population of over 9.6 million (census 2010), together with the metropolitan area "Jabodetabek" with a population of about 25 million, is the political, economic and industrial centre of the archipelago. This area is the main hub, especially for medium sized companies, and where you will find your customers and trading partners. An international airport as well as an overseas harbor provide the necessary connections to the whole world. The density of educational institutions eases the search for qualified personnel.

The German Centre Indonesia is a location in the world wide network of German Centres. The German Centres unite the strengths of businesses under one roof. They are supported by umbrella organizations of German business as well as federal and state ministries.

The German Centre Indonesia offers multifunctional spaces in variable sizes for lease as well as individual support for small and medium sized companies with their market entry.

This is where your success starts.

Hands-on support for your market entry

Since 1999, we have assisted small and medium sized companies in getting started in Indonesia. With over 22,000 sqm we offer customized spaces for production, office, laboratory and storage. Meeting facilities and exhibition spaces are available as well. Tax consultants, attorneys and other service providers as well as international gastronomy are located on the premises.

German products are highly recognized in Indonesia thus, with an address at the German Centre, the image "Made in Germany" can be conveyed convincingly to the local market.

The excellent infrastructure of the German Centre (100% power back-up, internet via in-house POP and fiber optic, i.a.) in addition to the individual support by

the German Centre team, allow a quick commencement of your business activities. Some of the advantages include;

- initial consultation on starting business activities in Indonesia
- an exchange of information and experience with other tenants and the building management
- a door opener with authorities, cooperation partners and insiders
- help with the fitting out of your new office
- opportunity for networking via in-house events
- various support on special issues (personnel, finding trading partners, internet and phone configuration, housing etc.)

The German Centre Indonesia is located in BSD City, a dynamic and growing suburb of Jakarta. Connected to two major highways, with attractive residential areas, the German International School, entertainment and shopping facilities, it is only a 40 minute drive to Jakarta's central business district and the international airport. Here you find an unstressed working environment, near to – but outside – the hectic capital city.

We look forward to your call and your visit to our premises.
